

UPDATING VIPER 4+ SOFTWARE VIA USB

Date Issued: February 26, 2024

DOWNLOADING THE SOFTWARE

1. Go to www.seedmaster.ca.
2. Go to the “Support” tab.
3. Click on “Software Downloads”.
4. Under the “VIPER 4+” heading, click on the latest software package.
5. The software will begin to download to your “Downloads” folder in File Explorer.

Note: The software is a large file and will take time to download.

COPYING THE SOFTWARE TO A USB

1. After the software has downloaded, prepare your USB. It needs to have all other files deleted from the drive prior to copying the Software Update.
 2. On the root directory of the USB drive, create a folder named “Raven”.
 3. Double-click into the Raven folder and create another folder called “Updates”.
 4. Navigate to the “Downloads” folder in File Explorer.
 5. Right-click on the Software Package, then click “Copy”.
 6. Double-click into the “Updates” folder on the USB drive, right-click, and select “Paste”.
 7. Once the folder is copied to the USB, safely remove the USB drive.
-

INSTALLING THE SOFTWARE

1. Power on and allow the Viper 4+ to boot up.
2. On the Viper 4+, touch “Administrator”.
3. Touch “System Manager”.
4. Plug the USB drive with the Raven folder on it into the Viper 4+. “Checking USB Drive” will be displayed.
5. Once the update file is downloaded to the monitor, the status “Install Ready” will be displayed.
6. Touch the “Install” button.
7. A caution window will pop up asking if you wish to proceed. Touch “Yes”.
8. The Viper 4+ will install the available update version and automatically restart.
